COVID-19 Coronavirus Update

Desert Air Conditioning, Inc. is open and servicing customers following guidelines that have been set by the Centers for Disease Control (CDC). Our number one priority is to keep you and our employees safe, especially during this difficult time.

We are considered an essential business and are here for your comfort needs. Summer is right around the corner and living here in the Coachella Valley we can be faced with extreme heat several months throughout the year, air conditioning is a necessity not a luxury.

We have put several procedures into place to keep you and our employees safe. We assure you that our technicians are under strict instruction to wash their hands regularly with hand sanitizer or warm water and soap for at least 20 seconds; they are avoiding touching their face including their eyes, nose, and mouth; they will maintain a six foot distance to adhere to the social distance guidelines; they are wearing gloves when necessary to do so.

If our employees are not feeling well, we are requiring them to stay home and seek medical attention consistent with the CDC and World Health Organization (WHO) guidelines.

This is an unprecedented time for everyone and is changing daily. We are committed to maintaining our high standard of service that we have been providing for 66 years.

Sincerely,

The Shaw Family
